

# JAIN TURBO TUBE STAKE

16 mm Lateral x 4/6mm OD PE/PVC Extension Tubing

Manufactured with high grade engineering plastic material

Special ribs to hold firmly in soil

194 mm

Suitable for holding 16mm OD tube.

Have special arrangement for holding 4mm and 6mm OD extension tube

Jain Turbo Tube Stake is a device used to secure and support the lateral that delivers water directly to the plants root zones. We have specially designed holding arrangements for the 4mm & 6mm OD PE/Vinyl extension tube at the top side of the stake..

Jain Turbo Tube Stake prevents the lateral from shifting or moving due to wind, animal activity, or other disturbances. This stability is crucial to ensure that the emitters or drippers remain positioned correctly near the plants' roots, delivering water efficiently without wasting it.

## Applications

- Suitable for Nursery, Green House, Pot Irrigation

## Ordering Specification
