

# STAPLE HD

Best Way to Hold the Dripline

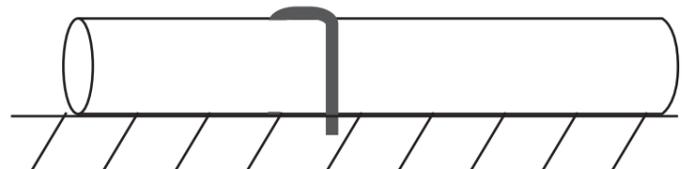

Straight Staple

Anchor Staple

## Features

- Staple HD is used to anchor the drip lines / plain laterals. It helps to avoid dispositioning of the tube. Also used to fix the landscape fabric
- High strength carbon steel material construction.
- Steel thickness is 3mm. Standard overall length 150mm. Length can be customized on demand.
- Suitable up to 25 mm OD tubes. Staples for 32mm OD tube and 40mm OD tube are available on demand
- Super easy to use, U shape staple can insert to ground securely, and make sure weed barrier material and drip lines in place.
- Available in Two models
  - Straight Staples
  - Anchor Staples
- Use 1 staple for every 1m of dripperline in sandy soil, every 1.2m in loamy soil and every 1.5m in clay soil.
